Single Modular Approval. For OEM integration only. This device must not be co-located or operating in conjunction with any other antenna or transmitter within a device; except in accordance with accepted multi-transmitter operating procedure. OEM integrators must be made aware not to provide information to the end-user regarding how to remove or install the RF module. OEM integrators and End-users must be provided with operating instructions for satisfying RF Exposure compliance.

20: All electrical and mechanical devices employed for spurious radiation suppression, including any modifications made during certification testing, must be incorporated in each unit marketed.
